Question 1

1 / 1 pts

What is the difference between a Mock Object and a Spy Object

☐ A Mock Object uses a class' interface but a Spy does not

☐

A Mock Object wraps an instance of a class and implements its interface but a Spy only implements the interface of that class

☒

A Spy wraps an instance of a class and implements its interface but a Mock Object only implements the interface of that class

☐

A Spy uses a class' interface but a Mock Object does not

Correct!

Question 2**1 / 1 pts**

What is the purpose of using a Spy over a Mock Object

Correct!

- ☐ A Spy will have better verification capabilities
- ☒ A Spy will implement and use an instance of the Class but still track usage like a Mock Object
- ☐ A Spy will be able to implement lambda functions as well as the normal interface
- ☐ A Spy can have multiple and iterative returns for calls to the same function

Question 3**1 / 1 pts**

Spies can be stubbed with *when...then* and other similar overrides just like a Mock Object

Correct!

- ☒ True
- ☐ False

Question 4**0 / 1 pts**

When using consecutive/iterative calls to a mocked method after the chain reaches the end it will reset to the first iteration.

You Answered☒ True**Correct Answer**☐ False**Question 5****1 / 1 pts**

I completed all pre-class readings and assignments for this topic before completing this quiz.

Correct!☒ True☐ FalseQuiz Score: **4** out of 5
