This attempt took less than 1 minute.

Question 1

1 / 1 pts

Which Statement about mock objects is **false**

- ☒ Mock Objects are used mostly for in integration testing
- ☐ Mock Objects can be used to test states of code that are difficult to reproduce through normal usage of the program
- ☐ Mock Objects can be used to test interactions with current code and code that does not yet exist
- ☐ Mock Objects use the interface of the object they are mocking

Incorrect**Question 2****0 / 1 pts**

Which is not a characteristic of objects that are useful to mock

- ☐ Objects that supply non-deterministic results (temp, time, etc.)
- ☐ Objects that may change behaviour throughout production
- ☒ Objects that are slow
- ☐ Objects that are purely primitive data holders

Question 3**1 / 1 pts**

Using the verify keyword during mocking means

- ☐ Verifying that the tests actually passed
- ☒ Verifying that certain mock objects/functions were or were not used
- ☐ Verifying that a Mock Object is using the correct interface
- ☐ Verifying that JUnit and Mockito are properly integrated

Question 4**1 / 1 pts**

Mockito can't throw exceptions on void methods

- ☐ True

☒ False

Question 5**1 / 1 pts**

I completed all pre-class readings and assignments for this topic before completing this quiz.

☒ True

☐ False

Quiz Score: **4** out of 5
