Score for this quiz: **5** out of 5

Submitted Jan 31 at 4:28pm

This attempt took 10 minutes.

Question 1	1 / 1 pts

What is AWS Lambda?

◉ A service that lets you run code without provisioning or managing servers

○ A service that allows you to host a web-service in the cloud

○ A service that lets you run code from an EC2 instance

○ All the above

Question 2	1 / 1 pts

What is the code you upload to AWS Lambda called?

- ○ A Java Archive
- ⦿ A Deployment Package
- ○ A Compressed Lambda Executable
- ○ A Lambda Code Base

Question 3   1 / 1 pts

How does AWS Lambda scale?

- ⦿ It automatically scales by adding additional instances of it as demand increases
- ○ By moving your application to more powerful machines as demand increases
- ○ It doesn't scale - it is a single EC2 instance
- ○ It scales by allowing you to purchase additional EC2 instances as demand increases

Question 4   1 / 1 pts

What do you pay for?

○ A monthly payment that you can increase to have more EC2 nodes

○ The time that your instance is active

◉ Only the time that your function code is actually processing events

○ None of the above

Question 5	1 / 1 pts

I completed all pre-class readings and assignments for this topic before completing this quiz.

◉ True

○ False
