Question 1   1 / 1 pts

Which of the following was NOT a kind of test discussed in the reading?

○ Unit Tests

○ Integration Tests

○ End-to-End Tests

○ Acceptance Tests

◉ All of the above were discussed in the reading.

Question 2   1 / 1 pts

Which of the following accurately describes the difference between white-box and black-box testing?

○ White box testing is done by the business people; black box testing is done by developers

◉ White box testing requires knowledge of the code being executed; Black box testing does not require knowledge of the implementation

○ White box testing does not require knowledge of the code being executed; Black box testing requires knowledge of the implementation

○ There is no difference; both are synonyms for the same kind of testing

Question 3   1 / 1 pts

Which of the following accurately describes equivalence partitioning?

◉ Dividing testing inputs into classes that should give the same test results

○ Verifying that the values at the boundaries are equal

○ Writing roughly equal amounts of the different types of tests

Question 4   1 / 1 pts

According to the testing pyramid, which kind of test should you probably have the **fewest** test cases of?

⦿ End-To-End Tests

○ Integration Tests

○ Unit Tests

○ You should have about the same number of each

Question 5   1 / 1 pts

I completed all pre-class readings and assignments for this topic before completing this quiz.

⦿ True

○ False

Quiz Score: **5** out of 5
