What is Aspect-Oriented Programming?

○ AOP is a new programming design that completely replaces Object-Oriented programming

◉ AOP is a programming technique that can increase modularity of your code

○ AOP is a plugin that is solely focused on improving program logging

○ AOP is a Java extension designed to replace object-oriented programming

## Question 2                                                                                   1 / 1 pts

1. Which of the following describes a cross-cutting concern?

○  Methods that have lots of code duplication which can be implemented in a single location.

○  Methods that only perform business logic

○  A form of error handling

◉  Methods that must be used in many classes and methods but can't be implemented in a single location using object-oriented programming.

## Question 3                                                                                   1 / 1 pts

Which issue does AOP address? (Mark all that are true)

☑  Code Scattering

☐  Project Dependencies

☑  Code Tangling

☐  Proper Debugging

**Incorrect**  ▶ **Question 4**                                                                 0 / 1 pts

Which of the following are parts of an aspect?

   ○  Nodes and Repositories

   ○  Pointcuts and advices

   ○  Constructors and Listeners

   ◉  Business logic and Tracing

---

### Question 5             1 / 1 pts

I completed all pre-class readings and assignments for this topic before completing this quiz.

   ◉  True

   ○  False

Quiz Score: **4** out of 5
