Question 1   1 / 1 pts

Which of the following is the proper sequence of events in TDD?

- ◉ Add a test, Run all Tests, Write the Code, Run tests, Refactor code

- ○ Run all Tests, Write the Code, Add a test, Run tests, Refactor code

- ○ Write the Code, Run all Tests, Add a test, Run tests, Refactor code

- ○ None of the above

Question 2   1 / 1 pts

Which of the following is **NOT** a best practice of TDD?

○   Separate common set-up and tear-down logic from the tests cases

○   Treat test code with the same respect as production code

◉

Execute test methods in an order that ensures the state left by each test is what the next test requires

○   None of the above

Question 3   1 / 1 pts

Which of the following is a benefit of TDD?

○   TDD may result in more unit tests

○   TDD can lead to more modularized code

○   TDD tends to result in tests that cover every code path

◉   All of the above

Question 4   1 / 1 pts

Test doubles (such as mocks) are **NOT** used in TDD?

○   True

○ False

Question 5

1 / 1 pts

I completed all pre-class readings and assignments for this topic before completing this quiz.

◉ True

○ False

Quiz Score: **5** out of 5
